Asthma is a chronic disease that affects the airways that carry oxygen in and out of the lungs. Asthma can cause

- shortness of breath,
- wheezing,
- coughing, and
- tightness in the chest.

Asthma attacks have been linked to many factors, including exposure to environmental hazards like

- allergens,
- tobacco smoke, and
- indoor and outdoor air pollution.

Asthma can be controlled by taking medication and avoiding triggers that can cause an attack.

Air Quality: Ground-Level Ozone[†]

Milwaukee County residents were exposed to unhealthy levels of ozone for **5 Days** in 2018.

Ozone occurs naturally in the sky and helps protect us from the sun's harmful rays. But ground-level ozone can be bad for your health and the environment. Ground-level ozone is one of the biggest parts of smog.

When ozone levels are above the national standard, everyone should try to limit their contact with it by reducing the amount of time spent outside.

Milwaukee County residents were exposed to unhealthy levels of ozone for **5 Days** in 2018.

Check the EPA's Air Quality Index (AQI) at AirNow.gov (<http://www.AirNow.gov>) to see the current air quality conditions for your location. You can use the AQI to plan your daily activities to reduce exposure to ozone.

Air Quality: Particulate Matter[†]

ANNUAL AMBIENT CONCENTRATION OF PM_{2.5}

9.0 $\mu\text{g}/\text{m}^3$ *

Milwaukee County, Wisconsin

12.0 $\mu\text{g}/\text{m}^3$ *

Annual National Standard

*Micrograms Per Cubic Meter ($\mu\text{g}/\text{m}^3$)

Air pollution is a leading environmental threat to human health.

Particles in the air like dust, dirt, soot, and smoke are one kind of air pollution called particulate matter.

Fine particulate matter, or PM_{2.5}, is so small that it cannot be seen in the air. Breathing in PM_{2.5} may

- lead to breathing problems,
- make asthma symptoms or some heart conditions worse, and
- lead to low birth weight.

The national standard for annual PM_{2.5} levels is 12.0 $\mu\text{g}/\text{m}^3$. When PM_{2.5} levels are above 12, this means that air quality is more likely to affect your health.

In 2018, the annual level of PM_{2.5} in **Milwaukee County** was 9.0 $\mu\text{g}/\text{m}^3$. *

* Micrograms per cubic meter (../InfoByLocation/images/content/PM2-5_5.jpg) ($\mu\text{g}/\text{m}^3$)

Smoking[†]

Tobacco use is the single most preventable cause of death and disease in the United States. Smoking harms nearly every organ of the body. It causes many diseases and reduces the health of smokers in general. The negative health effects from cigarette smoking account for an estimated 500,000 deaths, or nearly 1 of every 5 deaths, each year in the United States.

Extreme Heat[†]

with temperatures above 90°F

Extreme summer heat is increasing in the United States, and climate projections indicate that extreme heat events will be more frequent and intense in coming decades. Extremely hot weather can cause illness or even death. Knowing how hot it gets in your area can help you prepare for extremely hot temperatures and prevent heat related illness

(<http://emergency.cdc.gov/disasters/extremeheat/heattips.asp>).

Milwaukee County had with maximum temperatures above 90°F during May–September .

Heat-related death or illnesses are preventable if you follow a few simple steps.

- Stay cool.
- Stay hydrated.
- Stay informed.

Heart Attacks[†]

deaths from heart attacks in Milwaukee County

The environment is one of several factors (../showHeartExpRisk.action) that can lead to an increased risk for heart disease. High levels of air pollution and extreme hot and cold temperatures have been linked to increases in heart disease and deaths from heart attacks. A heart attack happens when a part of the heart muscle dies or gets damaged because of reduced blood supply.

In , there were

- **deaths** from heart attacks in Milwaukee County.
- **deaths** from heart attacks in Wisconsin.

Access To Parks[†]

Live within half a mile
of a park in Milwaukee
County

Having access to places for physical activity, like parks, encourages people to get active and do so more often. The closer you live to a park, the more likely you are to walk or bike there. Walking and biking to parks can decrease air pollution and car crashes, which in turn, can reduce chronic disease rates and traffic-related injuries.

In ,

of people living in **Milwaukee County** lived within half a mile of a park.

of people living in **Wisconsin** lived within half a mile of a park.
